

## HSB News Brief

---

HSB International is proud to announce that it has been awarded the dismantling contract for an LWC paper machine from an Ottawa-Gatineau paper mill site.

A renowned European paper machinery and systems manufacturer has purchased the machine for one of their Asian projects.

The 180 inch (4572 mm) paper machine was producing high quality LWC. The purchaser will rebuild the machine to produce another product. Dismantling and removal include the baled pulp handling area, coating kitchen, rewinder and roll wrapping, roll grinder and roll storage, and stores areas.

Part of the project scope includes the cleaning up of the paper mill buildings as the machinery is dismantled and shipped and leaving the site with the basic building utilities. As some buildings are historic, but the equipment must be removed, this work will provide some challenges to the team.

HSB appreciates the client's confidence and the opportunity to collaborate with their professional staff and the end-user's team.
